

Dr. Waqas Wahab

International Speaker & Trainer

(Clear Alinger Therapy)

A 1997 graduate of the esteemed de'Montmorency college of dentistry, Dr Waqas is the brains behind the development of ClearPath's patented aligner manufacturing process for which he not only received Achievement Award from none other than the President of Islamic Republic of Pakistan himself, in February 2012, but he was also awarded honorary fellowship of international college of dentistry in October 2014. In addition to being a senior dental surgeon at Defence Dental Centre, his hard core specialization lies in clear aligner therapy owing to his experience as Clinical Quality Manager, director R & D and director aligner orthodontics in Align technology, OrthoClear & ClearCorrect respectively. This makes him one of the very few dentists in the world with such diversity of clinical & manufacturing experience in the field of clear aligners. He further broadened his repertoire with his entrepreneurial venture, ClearPath & established himself as an international speaker by training many doctors, both nationally & internationally in regions like Asia, Africa, Middle East, South America, Australia & Europe.
